

CLP's Sustainability Principles

- Sustainability has always been integral to CLP.
- Our Value Framework reflects the moral compass of CLP, articulating our values, vision, mission and commitments.
- Our Sustainability Principles align CLP's business strategy with material sustainability issues we face. They are also supportive to several United Nations Sustainable Development Goals (SDGs).
- The Sustainability Principles cover four focus areas:
 - Our Community
 - Our People
 - Our Environment
 - Economic Sustainability

CLP is included in a number of sustainability indices

Our Sustainability Focus Areas and SDGs

In 2017, we streamlined our focus to four priority SDGs we believe to be most relevant to our business and on which we can make a significant impact.

- ❖ Supply reliable and affordable energy while seeking to reduce air pollutant emissions
- ❖ We launched our Climate Vision 2050 in 2007 and updated our targets in 2017

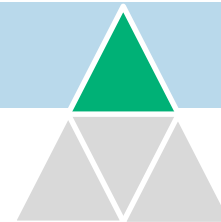

- ❖ Attracting and retaining talent is a key priority
- ❖ Supporting diversity in all forms including gender diversity initiatives and support of equal pay for work of equal value
- ❖ Widening the pipeline of women to support future business strategy

- ❖ We have continually innovated to sustain our business over the last century
- ❖ Additional channels of innovation are now required to adapt to the quickening pace of change
- ❖ Build infrastructure to support the sustainable development of the communities we serve
